Introduction to FlexPLM 9.0

Course Code	TRN-2205-T
Course Length	3 Days

Overview

In this course, you will learn how to complete basic FlexPLM functions including how to access and browse in the FlexPLM environment. You will learn how to locate and view product information and how to manage principle business objects such as Seasons, Products, and Colorways. You will gain a high-level understanding of how to find and create the objects in the FlexPLM Library used in day-to-day management of plans, concepts, materials and product line development data, as required by the FlexPLM user community.

You will complete Pro/FICIENCY skills assessment questions for each module. These questions are used to help reinforce your understanding of the course topics and form the basis for daily review sessions.

After completing the course, you will be prepared to complete basic FlexPLM tasks and activities, manage product development information, as well as have a better understanding of the FlexPLM system implementation at your company.

Prerequisites

- Basic browser and Web navigation skills.
- Basic understanding of Product Lifecycle Management processes and deliverables as they relate to Seasonal Product Development.

Audience

This course is intended for end users and System Administrators. The topics in this course are also available as Web-based training courses.

Topics

- Introduction to the FlexPLM Environment
 - Locating and Viewing Information
 - Working in the Libraries
 - Managing Materials
