### **3 HTi SIGNS BUSINESS PARTNERSHIP AGREEMENT WITH SOLIDO**

Medford, NJ - October 20, 2009 – 3 HTi, LLC enters a business agreement with Solido and adds the **SD300 Pro** 3D printer to its portfolio of PLM Management Solutions.

#### **3 HTi – Solido Business Partnership**

3 HTi signed a business agreement with Solido as a key source in the sales and marketing of the SD300 Pro 3D printer in North America. 3 HTi's strategic position offers a matchless growth for the 3D printer in the PLM marketplace. 3 HTi's business extends beyond the eastern seaboard and offers an important role in getting the word out for this revolutionary 3D printer.

**Garry Hoffman, VP of Sales at 3 HTi states**, "...the business partnership with Solido is an inherent step for our strategic marketing. The SD300 Pro printer adds a pivotal dimension to the 3 HTi PLM product portfolio."

This product makes in-house 3D model building available and affordable to markets where ownership was previously cost prohibitive," says **Eldad Sayada, Senior VP of Solido**. "We are providing a unique opportunity to the mechanical engineers, in the very early steps of the design that allows designers and engineers to evaluate products and catch design flaws much earlier in the product development process - and well within their budget", Sayada concluded.

#### **About 3 HTi**

3 HTi is a complete sales and service firm that provides a holistic solution in Product Life Cycle Management (PLM). The 3 HTi 75+ team members have the ability to service customers at a level that is un-paralleled by other firms. The 3 HTi solution blends specific expertise in the areas of people, processes and technology. 3 HTi offers a full line of services in the PLM market through software sales and maintenance, implementation services, certified training services, contract services, and personnel placement.

3 HTi is an authorized PTC Reseller. 3 HTi carries a full line of PTC Software Solutions including Pro/ENGINEER, Arbortext, CoCreate, Mathcad, and Windchill. 3 HTi is a Platinum reseller in PTC's Channel Advantage Program. In addition, 3 HTi is the exclusive reseller of NCSIMUL in the United States. 3 HTi now adds the SD300 Pro to its portfolio of PLM Management Solutions.

### **About Solido**

Solido is an industry leader in the development of 3D desktop model building technologies that utilize rigid plastic materials without requiring post-building cure. By combining patented technology with fresh, innovative thinking, Solido has developed the first 3D desktop printer that is cost-effective for all CAD/Cam professionals. Solido has the vision and financial resources to realize its long-term commitments. It complements technological leadership with quality and service that make every Solido solution and product an investment in the future.

### **Solido SD300 Pro**

The Solido SD300 Pro printer is a 3D Rapid Prototyping Machine with innovative technology to quickly create solid, plastic models directly from 3D CAD data from a workstation, and it fits right on a desktop. SD300 Pro 3D models can be used in all phases of the design cycle, from concept development to functional testing and assembly verification, saving time and money.

### **SD300 Pro Unique Features**

***Cost Effectiveness & Quality*** – The Solido SD300 Pro is the first 3D printer for under \$10K. Along with the low cost of the initial investment, there is a low cost of ownership. No post-build curing process is required and there is no need for dedicated personnel to operate the SD300 Pro. The accuracy, strength, quality & integrity of the parts make them suited for all stages of the design cycle.

***Easy to use*** – The Solido SD300 Pro printer portability and compact size is ideal for desktop prototyping. The effortless in using the Solido SD300 Pro printer extends to: the ease to print 3D model, simplicity in changing cartridges, and network compatible peripheral.

***Improved Workflow*** – The Solido SD300 Pro printer accelerates the design and development cycle (Art to Part), and allows immediate communication among colleagues and customers. The Solido SD300 Pro printer allows users to create a design and hold it in their hands without leaving their desk.
